

OCCO

Occo is a spice company that allows consumers to access molecularly fresher spice whenever they need it, in a more sustainable packaging design.

- Each Occo card contains 12 chambers of pre-portioned spice that have been sealed in a modified atmosphere environment to protect from decay and preserve flavor.
- Each chamber contains $\frac{1}{4}$ teaspoon of spice.
- Occo is filled with organic, recently harvested spices that have been sourced from ethical farms around the world.
- Our first product is the Essential Collection: 12 different cards, each containing a foundational spice, priced at \$40.
- Occo cards are made of Aluminum, the most recyclable and recycled material in the world.
- In a blind taste test, 94% of participants preferred food made with fresh spices vs. old spices.
